Projects

CineSuggest [GitHub Repository](#)

- recommendation system leveraging collaborative filtering techniques to personalize user movie suggestions.
- Implemented k-nearest neighbors algorithms to optimize recommendation accuracy based on user preferences and historical viewing data.
- Tech Stack: Python(Pandas,Numpy,Sci-Kit learn , Streamlit

RoadLane Detection [GitHub Repository](#)

- Developed and implemented algorithms for road lane detection using computer vision techniques.
- Utilized deep learning models such as Convolutional Neural Networks (CNNs) to accurately identify and classify road lanes.
- Contributed to improving road safety by developing software solutions for real-time lane detection in autonomous driving systems..

Wear2Care [GitHub Repository](#)

Eco-friendly clothing platform promoting reuse and recycling of used clothes by facilitating contributions to NGOs and recycling companies.

Intergrated the backend components and deploye the web application..

Tech Stack : NodeJs, ExpressJs, MongoDB Atlas

Technical Skills

Languages: Python, C++, HTML/CSS,SQL

Technologies/Frameworks: NodeJs, ExpressJs, MongoDB, BootStrap

CourseWork: Data Structure And Algorithms, Operating System, DataBase Management System, Computer Networks, OOPS, SQL

Certifications

NPTEL - Enhancing Soft Skills and Personality

HackerRank Python (Basic) Certificate

Completed "About Data Science and Analytics Career Paths and Certifications: First Steps" by LinkedIn Learning

Certification for Korean Language Hobby

HackerRank SQL (Intermediate) Certificate
